

# WAJ Science Club Summary —#4

April 13, 2023

**4-H Program Manager:** Sara Poggi-Decker \* **WAJ Teacher:** Debbie Valerio  
**Chaperones:** 4 \* **Students:** 18

The April meeting of the WAJ Science Club was on a sunny, hot, day in the Siuslaw Model Forest. We discussed the methods and resources for identifying plants and animals. I brought out some skulls and pelts of different animals including deer, coyote and beaver. I also showed the students some widely used books and apps for identifying plants and animals. We hiked and used some identification skills along the way. We spotted many painted turtles basking in the pond.
