

WAJ Science Club Summary —#6

June 8, 2023

4-H Program Manager: Sara Poggi-Decker * **WAJ Teacher:** Debbie Valerio

Chaperones: 3 * **Students:** 10

This was our last meeting of the school year. The original plan was to do a service project in the Siuslaw Model Forest. Unfortunately due to poor air quality resulting from the wildfires in Canada we had to change plans and meet inside the CCE building. As a final project the students built and painted wooden bird houses. We also finished up with a short discussion and game about wildfires and prescribed fires. It wasn't what we had originally planned for but we had a great last meeting and thank you for the support provided this year!
